What is Classified

Classified is an online portal for pre employment screening services making the screening process for hiring managers easier and more efficient.

The system is used to conduct different services, depending on your organisations request, these include: DBS checks, BPSS (including employment/personal/academic references), ID verification, RTW and Overseas criminal record checks. All information regarding the candidate including their ID will be saved onto their Classified account.

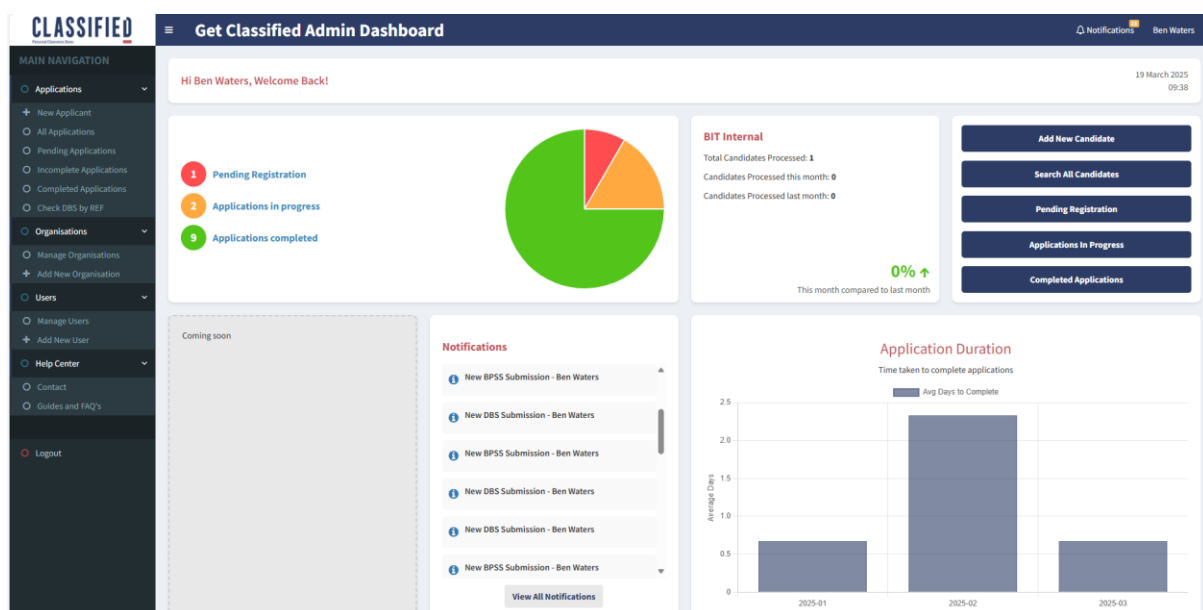

The below link will take you to the Classified portal.

You will need your email address and password to log in, you will then be sent an MFA to your email.

<https://classified.getclassified.co.uk/>

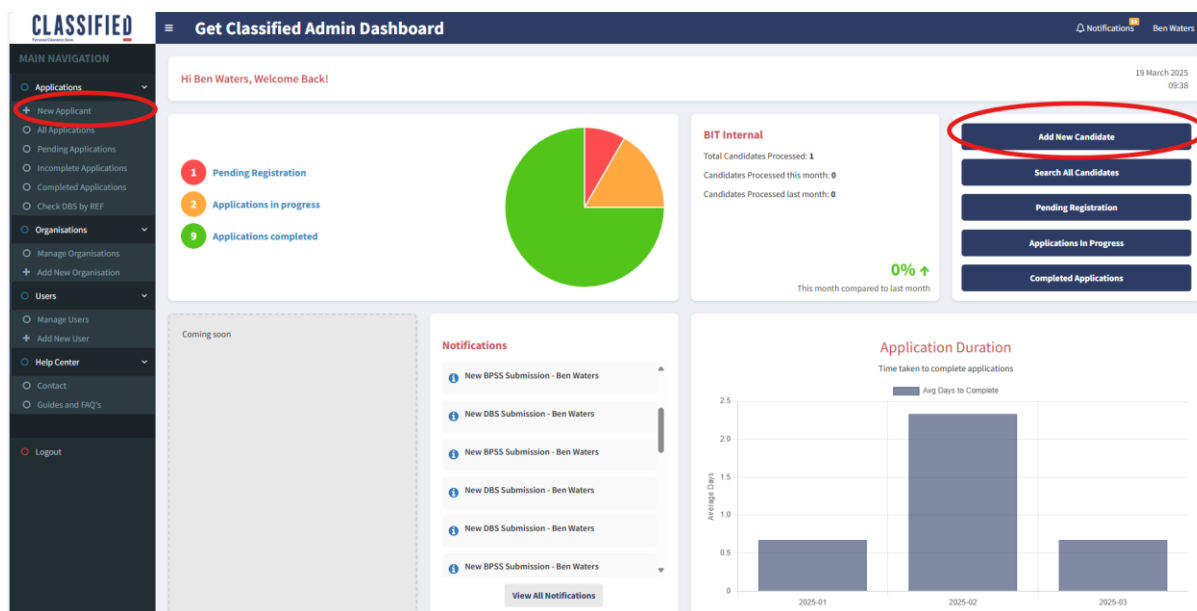

How to add a Candidate

After you have logged in, you should see the screen below. If you do not see this click the Classified Logo in the top left to go back to this main dashboard. **Please note your dashboard may look different, either from updates or account type*

On the left hand side there is a menu, this is the quickest way to switch between pages. You can open and close this menu by clicking the 'burger' icon which looks like this: 

Under the heading “Applications” click “+ New Applicant”, alternatively on the dashboard you will see a button that says “Add New Applicant”. Both will lead to the same page.

From this new page shown below, you can enter the new candidates details. I will also explain what each input is for.

The screenshot shows the 'New Applicant' form. It includes fields for Email address, Forename, Surname, Approved Access Number, Organisation (BIT Internal), and Application Type (DBS and BPSS Applications). There are also sections for File 1, File 2, File 3, and File 4, each with a 'Choose File' button and a 'File Type' dropdown. A 'Send Application Request' button is at the bottom. The footer shows 'Copyright © 2025 Blue Screen IT Ltd. All rights reserved.' and 'Version 2.1.4'.

Email address is self explanatory, this is how we send the invitation to the candidate and is our main point of contact. **Required*

Clearance Request Date, this is when the clearance needs to be done by. But don't worry, we always try to complete a clearance as quickly as possible whilst remaining thorough. This is more of a guideline for us. **Required*

Forename, the candidates first name. **Required*

Surname, the candidates last name. **Required*

Approved Access Number, this is solely for your benefit. This can be anything you want it to be but most sites use a HR tracking number used for that candidate's job application or other. **Required*

Applicant Contact Number, the candidate's phone number. This is optional as we will get it once the candidate fills out their DBS application. But it's a good option, if you have it, as a secondary contact if they are not responding to emails. **Optional*

Organisation, ordinarily you will only have one option here, the company you are adding the candidate to. But in the case that you have multiple setups for separate sites, you may be given access to more than one. **Required*

Application Type, this is what you are adding them to Classified for. This may be a DBS application, DBS with BPSS, revalidation of BPSS or other. **Required*

Files, here you can upload any supporting evidence you may have. However you will be able to add files to the user at any point during the process. What you add will vary between organisations and application type, if you are unsure please get in touch with us.

If you are checking IDs in person you can upload a signed copy of the IDs here, however you do not need to upload verified ID's if your organisation has opted to use our online ID check.

**Optional*

Then once complete, click the button at the bottom labeled **"Send Application Request"** shown below:

The screenshot displays a web form for adding a new user. On the left is a dark sidebar with navigation links: 'Help Center', 'Contact', 'Guides and FAQ's', and 'Logout'. The main form area contains several sections for file uploads. Each section has a 'Choose File' button and the text 'No file chosen'. To the right of these sections are four 'File Type' dropdown menus, each with a 'Select File Type' label. At the bottom of the form, a blue button labeled 'Send Application Request' is circled in red. Below the form, a copyright notice reads: 'Copyright © 2025 Blue Screen IT Ltd. All rights reserved.'

This will add the user to the system and send them a registration email.

Lastly please Email a Ticket to Screening (BIT Group)

The ticket will come in from a site in the screening mailbox and will generally look like this:

Candidate Name: Byron Pygg

Candidate Email: byronpygg@protonmail.com

Candidate Contact number: [00000000000](tel:00000000000)

Job Title/Role: Engineer

Department/VS: -----

Start Date: 16/11/2023.

Date of Birth: 01/01/1999

Line Manager: John Smith

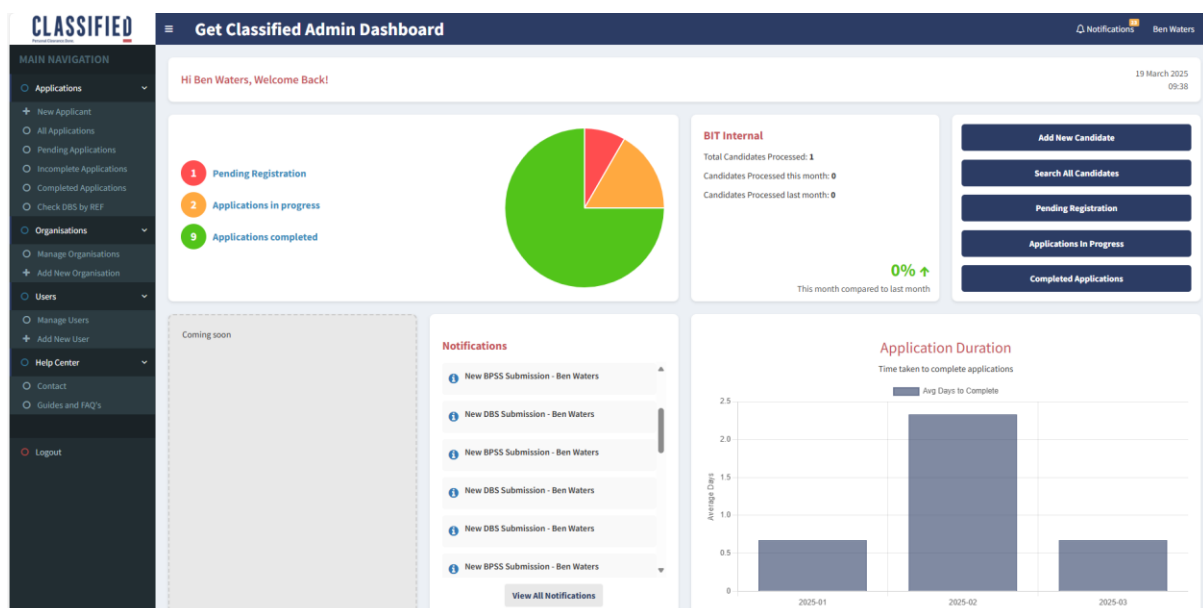

Employee or Contractor: *Employee*

If contractor, the name of the contracting company: **Contractors name or blank for employee**

This is optional but will help us to ensure we have alternative contacts for the candidate and for tracking purposes. Helping to reduce any additional questions from us.

How to access the Final Report

After you have logged in, you should see the screen below. If you do not see this click the Classified Logo in the top left to go back to this main dashboard. **Please note your dashboard may look different, either from updates or account type*

Click either 'Search All Candidates' or 'Completed Applications'

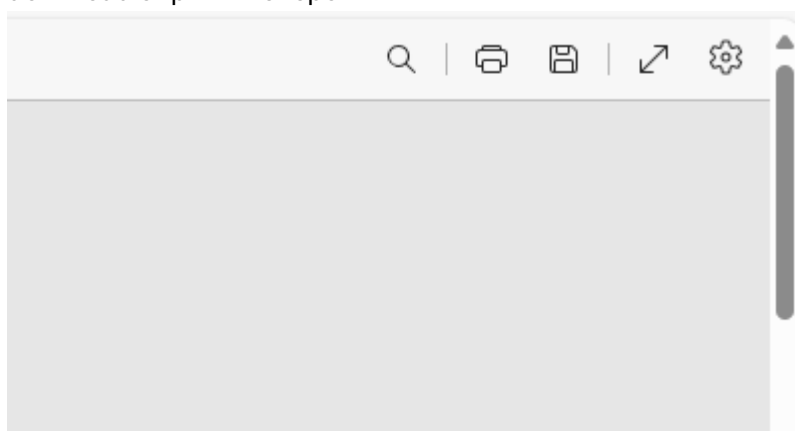

Then search for the specific candidate you would like the report for. If you are on 'Search All Candidates' the final report will be under Actions:

Status	Actions
Completed 2 months, 15 days ago	× Files Final Report

If you are on 'Completed Applications' it will be under Final Report:

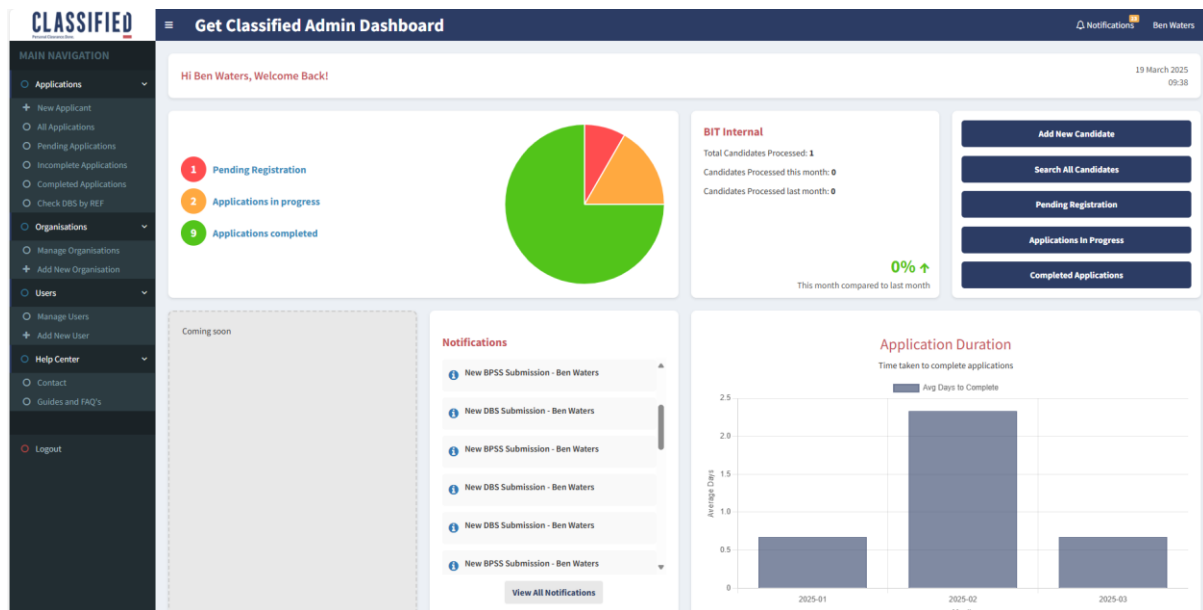

Status	Final Report	Date	Actions
Complete	Final Report	2 months, 15 days ago	× Files
Complete	Final Report	1 month, 23 days ago	× Files

Once clicked this will open the final report for that candidate, at which point you can view, download or print the report:

How to access DBS results

After you have logged in, you should see the screen below. If you do not see this click the Classified Logo in the top left to go back to this main dashboard. **Please note your dashboard may look different, either from updates or account type*

If the candidate has already completed their application, you can view the results via the Final Report – Please see above section. If the candidate is still in progress, there are two ways in which you can see the results of the DBS check.

Click either 'Search All Candidates' or 'Incomplete Applications'/'Applications In Progress'

Then search for the specific candidate you would like to view.

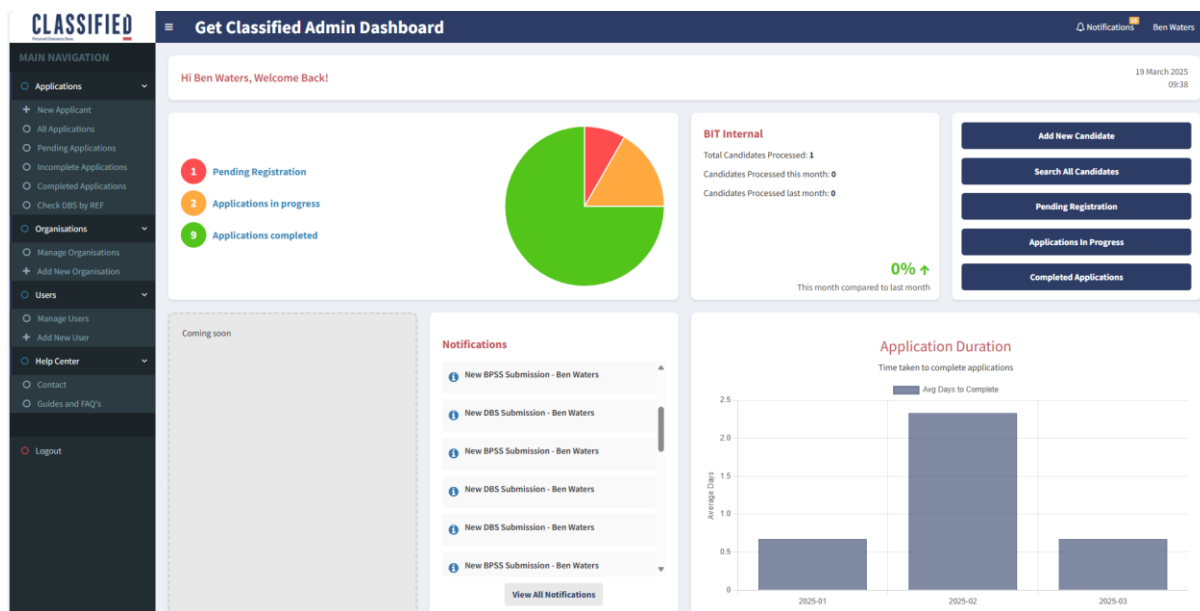

In the table you see there will be a column called 'Checks ordered' this will show you the stage of their DBS check they are at (if DBS has been asked for). If you see a green section that says certificate contains no information, then it has come back with no issues, pending review means we need to check it before sending it off and incomplete means the candidate has not yet finished the form.

Lastly to view the details they entered, click 'DBS' on the right hand side under actions. Alternatively you can view the same details under the Review section.

How to access files on Classified

After you have logged in, you should see the screen below. If you do not see this click the Classified Logo in the top left to go back to this main dashboard. **Please note your dashboard may look different, either from updates or account type*

On the left hand side there is a menu, this is the quickest way to switch between pages. You can open and close this menu by clicking the 'burger' icon which looks like this:

Click 'All Applications' on left hand side or the specific stage the candidate you are looking for is at.

How to use Digital Identity Verification

When adding a candidate you will get the option to use Yoti Identity Verification. If selected the following will occur, if not you will need to conduct the Identity Verification in person.

Organisation
BIT Internal

Application Type
DBS and BPSS Applications

☐ Use Yoti Digital Identity Verification

If you're not using Yoti, you will need to check their ID's manually and upload their verified ID's to the candidates' files.

The candidate's session will be generated after they complete the required forms. They will need 2 ID's and access to a smart phone or laptop/computer with a camera, this generally takes around 10 minutes.

Once the check has been carried out, we will check what has been verified and the outcome . The details of these checks can be viewed under 'YOTI' in the actions section of the search table. They can also be viewed through the review/final report section however the YOTI section

will show the results in more detail The YOTI check is in line with the DBS requirements so we can submit them after it returns.

Once we have the ID verified and additional ID are uploaded the DBS check will be submitted.

If the candidate doesn't have a UK or Irish Passport they will not be able to conduct the RTW check. Before their session is generated they will be asked if they have these documents, which will automatically determine whether they can do Yoti RTW.

YOTI from the candidate's view

To view the YOTI process from the candidates view, please follow the below link for a Demo. Please note that no information is held on file for the demo.
